

# *Geo* *Fast*

**Innovative system**

Georgian bars are being increasingly specified to give properties a more stylish and traditional look. The main benefits are:

- Authentic georgian effect
- Reduced production time
- Fast, efficient installation on site
- Snap-on system reduces use of adhesive tape

The innovative design of Georgian Bar also means it can be installed retrospectively and reused in the event of breakage of glazed units

## **Traditional and stylish**

Incredibly versatile, the bars can be used singly or scribed together to give a more authentic looking Georgian effect than aluminium bars within the sealed unit.

Georgian Bar can be fitted internally, externally or both and combined with box sash horns to give a truly traditional looking window.

24&28mm units can be accommodated with a choice of four bar designs
